ROHIT MALLAPUR

Associate Software Engineer | Application & Production Support | .NET Backend Development

📍 Bangalore | ✉️ rohitmallapur612@gmail.com | ☎️ +91 7026618277 | 🔗 Rohit Mallapur

Summary

Results-driven Associate Software Engineer with 2.5+ years of experience in Application and Production Support for enterprise applications, including North America region clients. Skilled in incident management, root cause analysis, and troubleshooting using .NET technologies and SQL Server, with hands-on experience across ServiceNow and BMC Remedy ITSM platforms. Experienced in IIS deployment, SSL/SSO configuration, production issue resolution, and end-to-end enhancement cycles involving SQL data changes and C# backend code updates. Proactively uses AI tools such as GitHub Copilot and Claude in day-to-day support and development work to accelerate debugging, scripting, and issue resolution. Seeking to leverage L2/L3 support expertise and hands-on .NET/SQL development experience in an Application Support (L2/L3) or .NET Backend Developer role.

Technical Skills

- Skills: Application Support, Production Support, Incident Management, Root Cause Analysis (RCA)
- Languages: C#, SQL
- Frameworks & Technologies: ASP.NET, MVC Architecture, .NET Core
- Database: Microsoft SQL Server, SSMS, Stored Procedures, Data Enhancement & Migration Scripts
- Application & Production Support: Incident Management, Root Cause Analysis (RCA), Troubleshooting, L2/L3 Support
- Security & Access Management: SSO (Single Sign-On), SSL Certificate Management, Active Directory, SailPoint, RBAC
- Cloud & Infrastructure: AWS (Migration Coordination), Server Management, System Monitoring
- Tools & Platforms: ServiceNow, BMC Remedy, GitHub, GitHub Copilot, Power BI
- Processes & Operations: Yearly/Quarterly Enhancement Cycles, Disaster Recovery Planning & Testing, Server Migration, Change Management
- Automation & AI Tools: GitHub Copilot, Claude (AI-assisted debugging, scripting & resolution), AI-based Automation

Experience

Cognizant Technology Solutions, Bangalore

Associate Software Engineer *Jul 2026 – Present*

Junior Software Engineer *Dec 2024 – Jul 2026*

Software Engineer Trainee *Dec 2023 – Dec 2024*

- Provided L2/L3 Application & Production Support for 2 critical and 20+ enterprise web applications, including financial systems.
- Managed 20+ incidents per week using ServiceNow and BMC Remedy, with average resolution within 48 hours.
- Performed Root Cause Analysis using logs, SQL queries, and code tracing.
- Adopted AI-assisted tools (GitHub Copilot, Claude) into daily support and development workflows to speed up debugging, script writing, and issue triage, driving faster and more consistent incident resolution.
- Worked on yearly and quarterly enhancement cycles for a .NET-based client application: queried and updated production data (including client tax data updates) using SQL/SSMS, validating changes in non-production environments before promoting to production.
- Implemented C# backend code changes in the application as part of enhancement releases, alongside associated data updates.
- Troubleshot production application issues by analyzing both .NET (C#) code and SQL code to identify root cause and implement fixes.

- Performed Change Management by creating and managing Change Requests (CRQs) for production deployments, enhancements, and upgrades, ensuring approvals, scheduling, and risk assessment were completed prior to implementation.
- Debugged .NET applications (C#, ASP.NET) and resolved defects.
- Executed SQL Server operations and data fixes.
- Managed IIS deployments including service restarts, code updates, and validation.
- Configured SSO and SSL certificates for secure application access.
- Handled User Access Management via Active Directory and SailPoint (RBAC).
- Collaborated with AWS teams during migration activities.
- Contributed to Disaster Recovery planning and testing.
- Led critical incident calls and coordinated with cross-functional teams for resolution.
- Participated in server lifecycle and migration activities.
- Proposed an AI-based automation concept for duplicate incident detection and auto-cancellation, analyzing user-provided data and ticket descriptions from BMC Remedy; pitch was adopted by the team, reducing redundant incidents and improving support efficiency.

Education

PES University, Bangalore
Master of Computer Applications | Dec 2021 – Oct 2023
- GPA: 7.68/10.0

MES M.M. Arts and Science College, Sirsi
Bachelor of Science (PMCS) | Jul 2018 – Nov 2021
- Percentage: 74.02%
